Volume 22, 1990

Subject Index

A

Additive inheritance — Genetic analysis of twinning rate in Israeli Holstein cattle, 349

Africa — Cytogenetic analysis of the *Anopheles gambiae* complex in a south-eastern village of the Burkina-Faso *(in French)*, 161

Albino — Genetic aspects of a new mutation *(S^{al-s})* to sex-linked imperfect albinism in chickens, 447

α-Amylase — Molecular cloning and partial sequence characterization of the duplicated amylase genes from *Drosophila erecta*, 57

Animal model — Estimating genetic parameters using an animal model with imaginary effects, 133

***Anopheles gambiae* complex** — Cytogenetic analysis of the *Anopheles gambiae* complex in a south-eastern village of the Burkina-Faso *(in French)*, 161

Artificial selection — Optimization of selection response under restricted inbreeding, 93

B

Bayesian methods — Variance estimation from integrated likelihoods (VEIL), 403

Biochemical polymorphism — Tentative analysis of genetic relationship between French cattle breeds using biochemical polymorphism *(in French)*, 317

British Shorthorn breed — Tentative analysis of genetic relationship between French cattle breeds using biochemical polymorphism *(in French)*, 317

C

Canonical transformation — Restricted best linear unbiased prediction using canonical transformation, 339

Cattle — Tentative analysis of genetic relationship between French cattle breeds using biochemical polymorphism *(in French)*, 317 — Genetic analysis of twinning rate in Israeli Holstein cattle, 349 — Synaptonemal complex behaviour in a bull homozygous for the 1;29 Robertsonian translocation, 361

Centric fusion — Cytogenetic studies in *Sinipta dalmani* Stål (Orthoptera: acrididae). II. Effects of centric fusions on chiasma frequency and distribution, 263

Chiasma — Cytogenetic studies in *Sinipta dalmani* Stål (Orthoptera: acrididae). II. Effects of centric fusions on chiasma frequency and distribution, 263

Chicken — Genetic aspects of a new mutation *(S^{al-s})* to sex-linked imperfect albinism in chickens, 447 — Correlations of genetic resistance of chickens to Marek's disease viruses with vaccination protection and *in vivo* response to phytohemaglutinin, 457

Chinese breed — Estimation of crossbreeding parameters between Large White and Meishan porcine breeds. II. Growth before weaning and growth of females during the growing and reproductive periods, 431

Chromosomal polymorphism — Cytogenetic analysis (GTG, CBG and NOR bands) of a wild boar population (*Sus scrofa scrofa*) with chromosomal polymorphism in the south-east of Spain, 1

Ciprinid fish — Genome size variation and evolution in North American cyprinid fishes, 11

Computer simulation — Optimization of selection response under restricted inbreeding, 93

Crossbreeding parameter — Estimation of crossbreeding parameters between Large White and Meishan porcine breeds. II. Growth before weaning

and growth of females during the growing and reproductive periods, 431

Curly coat — Dominant curly coat in horses, 257

Cytogenetic — Cytogenetic analysis of the *Anopheles gambiae* complex in a south-eastern village of the Burkina-Faso *(in French)*, 161

D

Domestic cat — Cat population genetics of Reunion Island *(in French)*, 367

Dominance — Genotypic covariance matrices and their inverses for models allowing dominance and inbreeding, 65

Drosophila erecta — Molecular cloning and partial sequence characterization of the duplicated amylase genes from *Drosophila erecta*, 57

Drosophila melanogaster — Seasonal fluctuations of cosmopolitan inversion frequencies in a natural population of *Drosophila melanogaster*, 47 — The distribution of the *P-M* system in *Drosophila melanogaster* strains from the People's Republic of China, 175 — Starvation and desiccation tolerance in *Drosophila melanogaster:* differences between European, North African and Afrotropical populations, 381

***Drosophila melanogaster* complex** — *Hobo* elements and their deletion-derivative sequences in *Drosophila melanogaster* and its sibling species *Drosophila simulans, Drosophila mauritiana* and *Drosophila sechellia*, 393

***Drosophila nasuta* subgroup** — Incipient reproductive isolation between *Drosophila nasuta* and *Drosophila albomicans*, 31

Drosophila subobscura — Homologous sequences to the *P* transposable element in *Drosophila subobscura*, 307

E

Ecological genetics — Starvation and desiccation tolerance in *Drosophila melanogaster:* differences between European, North African and Afrotropical populations, 381

Effective size — Optimization of selection response under restricted inbreeding, 93

Electrophoresis — Genetic variability and differentiation in red deer (*Cervus elaphus* L) of Central Europe, 289

Electrophoretic and morphometric variations — Evolutionary systematic of three species of troglobitic beetles: electrophoretic and morphological evidence, 189

Environmental stress — Starvation and desiccation tolerance in *Drosophila melanogaster:* differences between European, North African and Afrotropical populations, 381

Esterase — Esterase variation among Argentine populations of *Trimerotropis pallidipennis* (Orthoptera), 279

Estimation — Estimating genetic parameters using an animal model with imaginary effects, 133

Evolution — *Hobo* elements and their deletion-derivative sequences in *Drosophila melanogaster* and its sibling species *Drosophila simulans, Drosophila mauritiana* and *Drosophila sechellia*, 393

F

Fast algorithm — Computing inbreeding coefficients quickly, 419

Fitness component — Incipient reproductive isolation between *Drosophila nasuta* and *Drosophila albomicans*, 31

French breeds — Tentative analysis of genetic relationship between French cattle breeds using biochemical polymorphism *(in French)*, 317

G

Gene conversion — Molecular cloning and partial sequence characterization of the duplicated amylase genes from *Drosophila erecta*, 57

Generation interval — Mass selection in livestock using limited testing facilities, 109

Genetic distance — Genetic variability and differentiation in red deer (*Cervus elaphus* L) of Central Europe, 289 — Tentative analysis of genetic relationship between French cattle breeds using biochemical polymorphism *(in French)*, 317

Genetic parameter — Estimating genetic parameters using an animal model with imaginary effects, 133
Genetic variability — Genetic variability and differentiation in red deer (*Cervus elaphus* L) of Central Europe, 289
Genetic variance — Effects of selection and assortative mating on parameters of the additive genetic model *(in French)*, 119
Genetic variation — Esterase variation among Argentine populations of *Trimerotropis pallidipennis* (Orthoptera), 279
Genetics — Cat population genetics of Reunion Island *(in French)*, 367
Genome size (DNA content) — Genome size variation and evolution in North American cyprinid fishes, 11
Geographical distribution — The distribution of the *P-M* system in *Drosophila melanogaster* strains from the People's Republic of China, 175
Geographical race — Starvation and desiccation tolerance in *Drosophila melanogaster:* differences between European, North African and Afrotropical populations, 381
Growth — Selection on testis size as an indicator of maturity in growing animals. I. Direct and correlated responses in growth, 231 — Selection on testis size as an indicator of maturity in growing animals. II. Correlated responses in reproductive rate, 247 — Estimation of cross-breeding parameters between Large White and Meishan porcine breeds. II. Growth before weaning and growth of females during the growing and reproductive periods, 431

H

Haemoglobin — Resistance to experimental infections with *Haemonchus contortus* in Romanov sheep, 205
Haemonchus contortus — Resistance to experimental infections with *Haemonchus contortus* in Romanov sheep, 205
Hardy-Weinberg equilibrium — Cytogenetic analysis of the *Anopheles gambiae* complex in a south-eastern village of the Burkina-Faso *(in French)*, 161
Heterochromatin — Cytogenetic analysis (GTG, CBG and NOR bands) of a wild boar population (*Sus scrofa scrofa*) with chromosomal polymorphism in the south-east of Spain, 1
Hobo — *Hobo* elements and their deletion-derivative sequences in *Drosophila melanogaster* and its sibling species *Drosophila simulans, Drosophila mauritiana* and *Drosophila sechellia*, 393
Homogamy — Effects of selection and assortative mating on parameters of the additive genetic model *(in French)*, 119
Horse — Chromosome analysis of horse oocytes cultured *in vitro*, 151 — Dominant curly coat in horses, 257
Humoral response — Resistance to experimental infections with *Haemonchus contortus* in Romanov sheep, 205

I

Inbreeding — Genotypic covariance matrices and their inverses for models allowing dominance and inbreeding, 65 — Optimization of selection response under restricted inbreeding, 93
Inbreeding coefficients — Computing inbreeding coefficients quickly, 419
Infinitesimal models — Genotypic covariance matrices and their inverses for models allowing dominance and inbreeding, 65
Intrafamily variance — Effects of selection and assortative mating on parameters of the additive genetic model *(in French)*, 119
Inverse — Genotypic covariance matrices and their inverses for models allowing dominance and inbreeding, 65
Inversion frequency — Seasonal fluctuations of cosmopolitan inversion frequencies in a natural population of *Drosophila melanogaster*, 47
Isoenzymes — Genetic variability and differentiation in red deer (*Cervus elaphus* L) of Central Europe, 289
Isozyme — Esterase variation among Argentine populations of *Trimerotropis pallidipennis* (Orthoptera), 279

K

Karyotype — Cytogenetic analysis (GTG,

CBG and NOR bands) of a wild boar population (*Sus scrofa scrofa*) with chromosomal polymorphism in the south-east of Spain, 1

L

Linear programing — Optimization of selection response under restricted inbreeding, 93

M

Marek's disease — Correlations of genetic resistance of chickens to Marek's disease viruses with vaccination protection and *in vivo* response to phytohemaglutinin, 457

Mass selection — Mass selection in livestock using limited testing facilities, 109

Maturity — Selection on testis size as an indicator of maturity in growing animals. I. Direct and correlated responses in growth, 231

Maximum likelihood — Estimating genetic parameters using an animal model with imaginary effects, 133 — Variance estimation from integrated likelihoods (VEIL), 403

Meiosis — Chromosome analysis of horse oocytes cultured *in vitro*, 151 — Synaptonemal complex behaviour in a bull homozygous for the 1;29 Robertsonian translocation, 361

Mixed model — Genotypic covariance matrices and their inverses for models allowing dominance and inbreeding, 65

Mobile elements — The distribution of the *P-M* system in *Drosophila melanogaster* strains from the People's Republic of China, 175

Molecular evolution — Molecular cloning and partial sequence characterization of the duplicated amylase genes from *Drosophila erecta*, 57 — Homologous sequences to the *P* transposable element in *Drosophila subobscura*, 307

Mouse — Selection on testis size as an indicator of maturity in growing animals. I. Direct and correlated responses in growth, 231 — Selection on testis size as an indicator of maturity in growing animals. II. Correlated responses in reproductive rate, 247

Multiple trait animal model — Restricted best linear unbiased prediction using canonical transformation, 339

Mutation — Genetic aspects of a new mutation ($S^{al\text{-}s}$) to sex-linked imperfect albinism in chickens, 447

N

Natural selection — Genome size variation and evolution in North American cyprinid fishes, 11

Non-disjunction — Chromosome analysis of horse oocytes cultured *in vitro*, 151

Nuclear-maturation — Chromosome analysis of horse oocytes cultured *in vitro*, 151

Nucleolus organizer region — Cytogenetic analysis (GTG, CBG and NOR bands) of a wild boar population (*Sus scrofa scrofa*) with chromosomal polymorphism in the south-east of Spain, 1 — Nucleolus organizer regions, types of association and identification of carrier chromosomes in domestic sheep, 273

O

OLA system — Resistance to experimental infections with *Haemonchus contortus* in Romanov sheep, 205

Oocyte — Chromosome analysis of horse oocytes cultured *in vitro*, 151

Orthoptera — Cytogenetic studies in *Sinipta dalmani* Stål (Orthoptera: acrididae). II. Effects of centric fusions on chiasma frequency and distribution, 263 — Esterase variation among Argentine populations of *Trimerotropis pallidipennis* (Orthoptera), 279

P

***P* transposable element** — Homologous sequences to the *P* transposable element in *Drosophila subobscura*, 307

Paternity — On sire evaluation with uncertain paternity, 373

Phylogeny — Tentative analysis of genetic relationship between French cattle breeds using biochemical polymorphism *(in French)*, 317

Phytohemaglutinin — Correlations of genetic resistance of chickens to Marek's disease viruses with

vaccination protection and *in vivo* response to phytohemaglutinin, 457
Pig — Estimation of crossbreeding parameters between Large White and Meishan porcine breeds. II. Growth before weaning and growth of females during the growing and reproductive periods, 431
Population — Cat population genetics of Reunion Island *(in French)*, 367

R

Recursion — Genotypic covariance matrices and their inverses for models allowing dominance and inbreeding, 65
Red deer — Genetic variability and differentiation in red deer (*Cervus elaphus* L) of Central Europe, 289
Reproduction — Selection on testis size as an indicator of maturity in growing animals. II. Correlated responses in reproductive rate, 247
Restricted BLUP — Restricted best linear unbiased prediction using canonical transformation, 339
Reunion Island — Cat population genetics of Reunion Island *(in French)*, 367
Robertsonian translocation — Synaptonemal complex behaviour in a bull homozygous for the 1;29 Robertsonian translocation, 361

S

$S^{al\text{-}s}$ — Genetic aspects of a new mutation ($S^{al\text{-}s}$) to sex-linked imperfect albinism in chickens, 447
Seasonal change — Seasonal fluctuations of cosmopolitan inversion frequencies in a natural population of *Drosophila melanogaster*, 47
Selection — Effects of selection and assortative mating on parameters of the additive genetic model *(in French)*, 119 — Selection on testis size as an indicator of maturity in growing animals. I. Direct and correlated responses in growth, 231 — Selection on testis size as an indicator of maturity in growing animals. II. Correlated responses in reproductive rate, 247 — Genetic analysis of twinning rate in Israeli Holstein cattle, 349
Selection intensity — Mass selection in livestock using limited testing facilities, 109
Selection response — Mass selection in livestock using limited testing facilities, 109
Sequential R-NOR banding — Nucleolus organizer regions, types of association and identification of carrier chromosomes in domestic sheep, 273
Sheep — Resistance to experimental infections with *Haemonchus contortus* in Romanov sheep, 205 — Nucleolus organizer regions, types of association and identification of carrier chromosomes in domestic sheep, 273
Sire evaluation — On sire evaluation with uncertain paternity, 373
Speciation — Genome size variation and evolution in North American cyprinid fishes, 11 — Incipient reproductive isolation between *Drosophila nasuta* and *Drosophila albomicans*, 31
Subspeciation — Incipient reproductive isolation between *Drosophila nasuta* and *Drosophila albomicans*, 31
Synaptonemal complexes — Synaptonemal complex behaviour in a bull homozygous for the 1;29 Robertsonian translocation, 361
Systematic — Evolutionary systematic of three species of troglobitic beetles: electrophoretic and morphological evidence, 189

T

Testis — Selection on testis size as an indicator of maturity in growing animals. I. Direct and correlated responses in growth, 231 — Selection on testis size as an indicator of maturity in growing animals. II. Correlated responses in reproductive rate, 247
Threshold model — Genetic analysis of twinning rate in Israeli Holstein cattle, 349
Transposable element — *Hobo* elements and their deletion-derivative sequences in *Drosophila melanogaster* and its sibling species *Drosophila simulans*, *Drosophila mauritiana* and *Drosophila sechellia*, 393
Trimerotropis pallidipennis — Esterase variation among Argentine populations of *Trimerotropis pallidipennis* (Orthoptera), 279

Troglobitic beetle — Evolutionary systematic of three species of troglobitic beetles: electrophoretic and morphological evidence, 189
Twinning — Genetic analysis of twinning rate in Israeli Holstein cattle, 349

V

Vaccination — Correlations of genetic resistance of chickens to Marek's disease viruses with vaccination protection and *in vivo* response to phytohemaglutinin, 457
Variance components — Variance estimation from integrated likelihoods (VEIL), 403

W

Wild boar — Cytogenetic analysis (GTG, CBG and NOR bands) of a wild boar population *(Sus scrofa scrofa)* with chromosomal polymorphism in the south-east of Spain, 1

Reviewer Index to volume 22, 1990

The Scientific Editors of *Genetics, Selection, Evolution* would like to thank all the people listed below for kindly reviewing manuscripts during the preparation of volume 22. This list also includes the referees who read papers submitted more than two years ago and which are now considered as withdrawn by their authors.
